

ISMAIL SIKLODI

Senior Full-Stack Engineer

+91 8689852249 | siklodiismail1@gmail.com | linkedin.com/in/ismail-siklodi | Thane, Maharashtra, India

PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack and Mobile Engineer with 8+ years of experience building production-grade fintech platforms for UK financial institutions. Delivered 4 live mobile banking apps (iOS and Android), each serving thousands of real customers, using React Native, Ionic, Angular, and Node.js. Designed a multi-brand shared codebase serving 4 UK Building Societies from a single source, cutting per-client delivery time by 40%. Experienced Agile team lead: mentored a team of 10+ developers, drove code review culture, led client-facing requirement gathering and new-client demo sessions, and managed end-to-end App Store deployment and CI/CD pipelines. Strong domain expertise in mobile banking, net banking portals, configurable admin dashboards, and back-office automation with RPA. Open to senior / lead roles, remote or hybrid.

TECHNICAL SKILLS

Mobile: React Native, Ionic, Capacitor, Cordova, Android Studio (Java), Xcode (Swift)

Frontend: Angular, React.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Angular Material, Ionic UI

Backend / API: Node.js, Express.js, RESTful API Design, JWT Authentication, Third-party API Integration

Security: App and API security hardening, security fix implementation, penetration-test remediation, secure authentication flows

Fintech Domain: Mobile Banking Apps, Internet Banking Portals, Configurable Admin Dashboards, Core Banking API Integration

RPA / Automation: SikuliX workflow bots, back-office process automation, scripted bots

DevOps / Deployment: Google Play Store, Apple App Store, CI/CD Pipelines, Git, GitHub, Build and Release Management

Testing: Jest (Unit), Manual Testing, QA Collaboration, Cross-platform Testing

Cloud / Tools: Firebase, AWS, Postman, JIRA, VS Code

Methodologies: Agile / Scrum, Team Leadership, Code Reviews, Technical Mentoring, System Architecture

PROFESSIONAL EXPERIENCE

Lead Frontend and Mobile Developer | Consectus India Pvt Ltd (Payohima Services) Nov 2021 - Present

Clients: Tipton Building Society | Bath Building Society | Monmouth Building Society | StepOne Finance

- Architected and delivered cross-platform mobile banking apps (iOS and Android) for 4 UK Building Societies using Ionic, Capacitor, and React Native, covering account management, fund transfers, secure authentication, and push notifications. Apps are live in production, collectively serving 50,000+ customers.
- Designed multi-brand shared codebase architecture from a single source, serving 4 branded products without duplication, cutting per-client delivery time by ~40% and significantly reducing maintenance overhead.
- Built a fully configurable Admin Dashboard in Angular enabling bank staff to control app screens, page visibility, text and alert messages, and side-menu options in real time, without code changes. Built companion Net Banking web portals for the same clients.
- Integrated REST APIs from Node.js backend teams across all frontend products, ensuring secure and reliable data flow between UI and core banking systems.
- Implemented security fixes across mobile apps and backend APIs including input validation hardening, token expiry handling, and authentication vulnerability patches to meet UK financial security standards.
- Designed and deployed SikuliX RPA bots to automate repetitive back-office banking workflows, saving 25+ manual staff hours per week across multiple client accounts.
- Managed end-to-end App Store lifecycle for all 4 clients: build, QA, versioning, and release on Google Play Store and Apple App Store.
- Led a frontend team of 10+ developers: conducted code reviews, mentored junior devs, and drove Agile/Scrum delivery in close collaboration with UK product owners and QA teams.
- Served as the primary technical point of contact for UK clients; conducted regular requirement-gathering calls, collected product feedback, and translated client needs into actionable development tasks.
- Delivered live app demonstrations to prospective new clients, showcasing platform capabilities and helping convert new UK Building Society accounts.
- Implemented CI/CD pipelines for automated build and deployment, improving release speed and reducing manual errors.

Software Developer | Citiustech Healthcare Technology Pvt. Ltd Apr 2021 - Oct 2021

- Built Member 360 Web Portal interactive dashboard with real-time charts, backend API integration, and responsive layouts using Ionic 5 and Angular.
- Developed Analytics Dashboard, a data-rich web application with multi-page navigation, interactive charts, and complex data visualization (TypeScript, Angular).
- Delivered GapFinder Demo App, an offline-capable cross-platform mobile app (iOS and Android) using Ionic 5 with JSON fixtures for robust testing.

Software Developer | Payohima Services India Pvt Ltd Oct 2019 - Mar 2021

- Built Tipton Digital Banking Hub, an internal staff-facing dashboard (Ionic 3, Node.js) to manage customer interactions on the Tipton Mobile Banking App.

- Developed Tipton Digital Banking App, a cross-platform (Android and iOS) customer-facing mobile banking application for a UK Building Society.
- Delivered multiple customized mobile banking demo apps for various UK Building Societies, each tailored to individual branding and requirements.
- Produced end-to-end technical documentation for all delivered hub and app components.

Software Developer | The Animator Feb 2019 - Sep 2019

- Developed frontend UIs using Ionic Framework and integrated REST APIs for client projects including Hu Boricha, Deshalpur, and Pragpur applications.

Software Developer | Sutra InfoTech May 2018 - Sep 2018

- Built beacon-based marketing application (Android and iOS) focused on location-based user engagement and campaign delivery.

Software Developer | Intelliconnect Technologies Apr 2017 - Apr 2018

- Way2Freedom: Built Android application (Java, Android Studio, Node.js) for managing reminders, meetings, and client communications.
- Style-At-IS: Developed iOS application (Swift, Xcode) and web portal (Angular 4) for a fashion brand and styling marketplace.

KEY ACHIEVEMENTS

- Delivered 4 live production mobile banking apps (iOS and Android) from zero to App Store, collectively serving 50,000+ real customers across UK Building Societies.
- Single-handedly designed multi-brand shared codebase architecture; 1 codebase powering 4 branded products, reducing per-client delivery time by 40%.
- Built a fully configurable Angular Admin Dashboard giving bank staff real-time control over app screens, text, alerts, and navigation without developer intervention.
- Implemented critical security fixes across mobile apps and backend APIs, ensuring compliance with UK financial security requirements.
- Deployed SikuliX RPA bots that automated back-office banking workflows, saving 25+ manual staff hours per week across multiple UK client accounts.
- Led and mentored a team of 10+ developers across 4 simultaneous client deliveries, maintaining high code quality through structured review practices.
- Acted as primary client liaison; conducted requirement-gathering calls, gathered product feedback, and delivered live demos to prospective new UK Building Society clients.
- 8+ years of uninterrupted fintech delivery with direct UK client exposure, a rare combination in the Indian market.

EDUCATION

Bachelor of Computer Applications (BCA) | YCMOU, 2018
